Filed: July 30, 2003)
For: AIRBAG SYSTEM DESIGNED FOR TWO)
PERSONS)

TRANSMITTAL OF INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicants and/or their attorneys and is being submitted so as to comply with the duty of disclosure set forth in 37 C.F.R. § 1.56. In accordance with 37 C.F.R. § 1.97(b), the enclosed Statement is being filed within three (3) months of the filing date of the above-identified application or before the mailing date of a first Action on the merits.

Neither applicants nor their attorneys make any representation that any information disclosed herein may be "prior art" within the meaning of that term under 35 U.S.C. § 102 or § 103. Moreover, pursuant to 37 C.F.R. § 1.97, the filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made or as an admission that the

information cited herein is, or is considered to be, material to patentability as defined in 37 C.F.R. § 1.56(b).

In accordance with 37 C.F.R. § 1.98, transmitted herewith are:

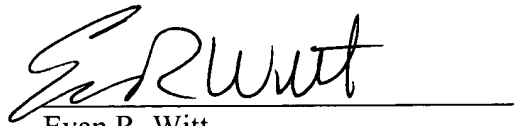

1. A completed copy of Form PTO/SB/08A "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and
2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08A.

NON-ENGLISH INFORMATION

Pursuant to 37 C.F.R. § 1.98, following is a concise explanation of the relevance (as it is presently understood by the individual designated in 37 C.F.R. § 1.56(c) most knowledgeable about the content of the information), of each listed patent, publication or other information that is not in the English language:

1. German Patent No. 19620537 published December 12, 1996, discloses: The airbag arrangement includes a pre-assembled module, consisting of at least one gas generator (14) and an air pillow (13), which is coupled to at least one module reception unit (instrumentation panel 9) associated to a construction area of the vehicle. The air pillow consists of at least one main chamber (18) associated with the gas generator (14), and at least one additional chamber (19) serving for the enlargement of the main chamber. The main chamber and the additional chamber have at least one common length of material (22). At least one segmental separation is provided between the main chamber and the additional chamber by means of a tear stitch (30), associated with the common length of material. The tear stitch is torn apart by a predetermined fill pressure in the main chamber in case of an activation of the gas generator during an accident.
2. German Patent No. 19933586 published January 11, 2001, discloses: Airbag device has elongate airbag sack (14), which is divided into 2 adjacent chambers (15, 16), via sewn seam (23) between successive airbag sack layers. Seam extends inwards from one airbag sack longitudinal edge in curved path leading to center point of airbag sack, at which seam is formed into circle, to leave flow path between center of airbag sack and opposite longitudinal edge, for successive inflation of chambers via single gas generator.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "E. R. Witt", is written over a horizontal line.
